CALDRIDGE PARTNERS, LLC

Capability Statement

Senior Technology Expertise for Your Mission

Caldridge Partners, LLC is an Oklahoma small business formed in 2026. We provide founder-led specialist support to federal prime contractors across enterprise architecture, systems integration, technology modernization, and AI and automation. Founder Kenyon Elliott brings 32 years of FAA program experience.

Core capabilities

Enterprise architecture	Current-state assessments, target architectures, roadmaps, standards and governance recommendations.
Systems integration	Interface and interoperability analysis, integration dependencies and transition strategies.
Technology modernization	Legacy-system evaluations, alternatives, technical trade studies and implementation planning.
AI and automation	AI use-case assessment, information analysis, survey interpretation, reporting automation and workflow planning.

How we work with prime contractors

Capture and proposal support; technical requirements and Statements of Work; architecture and integration plans; technical assessments; vendor and solution evaluations; modernization options; and delivery decision support. Work is scoped to defined technical needs within the prime contractor's program structure.

Representative founder experience

FAA information delivery modernization Led deployment of a cross-organizational XML information architecture supporting accessible content delivery and faster future site redesign.

Flight inspection operations Developed centralized flight scheduling and tracking capabilities supporting FAA operational certification requirements.

NAS service integration and security Contributed to NAS service registry initiatives, enterprise service standards and integration approaches that leveraged existing applications.

Aviation data and technical governance Supported runway-incursion safety data replication, cross-agency architecture forums and reuse-oriented technology planning.

Current and earlier consulting experience

Performance Dashboard (current Caldridge client): Technology advisory work involving AI-assisted survey interpretation, sentiment analysis, reporting automation and organizational analytics. Earlier independent work supported online survey capabilities. University of Oklahoma (earlier independent engagement): Technology architecture, infrastructure, sourcing and delivery assessment.

Federal contracting profile

NAICS: 541512 (Primary) | 541511 | 541519 | 541611

Entity: Caldridge Partners, LLC | Oklahoma | Formed 2026
